FOR IMMEDIATE RELEASE

Buster Grips Receives Approval from PGA Partners Club Testers

(TRAVERSE CITY, MI – Dec 18, 2007) – Buster Grips, a patented reverse taper golf grip, has received approval by PGA Partners Club testers. 184 of 236 people who tested the grip found the product to be beneficial and would recommend Buster Grips to other golfers. Testers cited the quality, durability, feel, comfort, design and control with Buster Grips as the key factors in their recommendation. Buster Grips are available through their website at <http://www.bustergrips.com>.

Product testers provided the following feedback about Buster Grips: “At my age, (66), I had given up hope of eliminating my slice with the driver. The first use of the grips I shot 5 strokes better on 9 holes than recent scores and the second time out improved by another 4. For a 20 handicapper I consider that quite remarkable.” “These grips are pretty amazing, I had a whole new feel for my driver.” “I first put the Buster Grip on my fairway wood to see if it could correct my slice, and it did. I put the second grip on my Taylormade R7 driver. I used it, and was very pleased with the results. The grips straightened out my slice no matter how hard I swung the driver.” “Used this on a 4 Iron and a 5 Hybrid. I improved my distance and accuracy on both clubs. I have never been able to hit the 4 iron well and now am using it all the time.” “With my arthritis I didn't think I could ever feel like I could grip my clubs like I used to. With these grips I can now hit my sand wedge with more confidence,” “Playing in the heat of the Arizona summer, you need a grip that is going to let you maintain control. Buster came through!”

Buster Grips, the original reverse taper golf grip, are USGA conforming and made in the USA. The combination of design features and high tech material creates a grip that fits the hand naturally and comfortably increasing power and control. The grips are available in black or hot pink.
